31621-BP1

Combed fiber on the seed of the five principal commercial types of cotton produced throughout the world: (1) **Sea Island**, produced almost entirely in Florida and Georgia, Puerto Rico, and the British West Indies. (2) **Egyptian**, produced largely in Egypt with small productions in Peru and in Arizona. (3) **American Upland long-staple**, grown largely in the Mississippi Valley with smaller productions in South Carolina, New Mexico, Arizona, and California, and in Brazil. (4) **American Upland short-staple**, constitutes the great bulk of the cotton produced in the United States, in southern Brazil, and Uganda. (5) **Asiatic**, comes largely from India and China (natural size).
